Dear HR Manager,

I am writing to express my interest in the **Product Intern** position at [Company Name]. As a final-year Computer Engineering student with hands-on experience in web development, product-focused projects, and collaborative team environments, I am excited about the opportunity to contribute to your dynamic product team.

During my academic journey, I've worked on diverse projects that strengthened my skills in building user-centric applications and understanding product lifecycles. Notably, I developed an **E-commerce web app** using React.js, Redux, and Firebase, where I applied feature planning, API integration, and user testing to improve the overall shopping experience. I also created a **Travel Planner** using Next.js and RapidAPI that offered real-time weather and currency info alongside interactive maps, showcasing my ability to think from both a user and product perspective.

In addition, I've explored AI integration through my **Trash Detection App**, where I collaborated with Python and YOLOv5 models to build an intuitive web interface. These experiences have sharpened my understanding of **SDLC, UI/UX principles, API workflows**, and **cross-functional communication**—skills that are key to product development.

I am deeply motivated to learn and grow in a fast-paced environment like yours. With a strong foundation in tech, product thinking, and a proactive mindset, I'm confident I can contribute meaningfully to your product development initiatives while gaining valuable industry experience.

Thank you for considering my application. I would welcome the opportunity to further discuss how I can be an asset to your team. Please find my resume attached for your review.

Sincerely,
Samyak Bajracharya
